

Excellence Beyond Expectation

➤ **Product Name:** HMMM Resin

Technical Parameters

Chemical Name: Hexamethoxymethyl melamine resin

Property:

This product is a kind of transparent viscous fluid or white wax solid, and it can dissolve in water and common organic reagent. It gives off methanal upon heating, so it is a good methanal donor. Also, this product can achieve better adhesive effect while work in with RS, RH and R.

Usage:

It can be used mixing with adhesive RS, silica aerogel. It is applied in natural rubber and artificial rubber adhering with nylon, steel wire, polyester, cotton, glass, fiber etc. It is not only directly added in rubber but also as soaking liquor.

Specification :

Item	Parameter
Appearance	Transparent viscous fluid or white wax solid
Combined methanal assay % Min	40.0
Density (20±°C) g/cm ³	1.18-1.21
Free methanal assay % Max	5.0
